

OBJECTIVE(S) OF MIGS TREATMENT

Improve **disease control** with the possibility of reducing or eliminating **medication use**

Improve disease control

- Lower eye pressure
- Maintain eye pressure
- Reduce risk of pressure increase after surgery
- Slow rate of progression
- Reduce medication side effects (e.g. eye redness, discomfort)
- Reduce need for additional surgery

Reduce or eliminate medication use

- Stop all
- Reduce amount
- Continue with current

Other Goals: _____
